

With real aluminum cones and butyl rubber surrounds, our premium motorcycle audio products offer more durability and audiophile sound quality than standard factory paper cone speakers or other after market polypropylene cone speakers. The aluminum cone design stands up better to the elements, as well as, the vibration of the motorcycle. These are the highest quality speakers available, offering you brilliant sound no matter how fast you're cruising!

The Bazooka motorcycle kit includes our FAST-HON Plug and Play interface cable with OEM connectors that plug directly into the factory Honda harness. This allows for quick installation in less than 30 minutes and maintains full use of all factory handle bar controls.

Each kit includes a 4-channel 200-watt amp that easily mounts in the trunk.

The Bazooka motorcycle audio kits work on all Honda GL1800 Gold Wing bikes.

Includes auxiliary output plug for an optional amplified BTA6100 Bazooka Bass Tube subwoofer that can be installed into the trunk. (BTA6100 and harness sold separately)

Motorcycle Audio for Honda
