Overview

This summer, the City of Buffalo is improving the roadway and utilities for 2nd Street S and 3rd Avenue S. The project includes improvements to sanitary sewer, water systems, storm sewer, and street re-construction. All improvements are paid for by the City of Buffalo Capital Improvement Program and not subject to special assessments.

Updated Schedule

All underground utility work within the street is anticipated to be complete by August 23rd. The only remaining utility work is replacement of private sewer and water services up to the homes of those who opted into this work. Street grading including placement of daintile, sand, and gravel base between 4th Ave. and the east project limits will begin the week of August 26th. Curb and gutter, and paving are scheduled to be complete by the end of September. Burial of overhead utility lines will follow in October. Topsoil placement and seeding will occur in areas not receiving sidewalk in late October. Sidewalks will be installed in Spring 2020 (north side of 2nd St.) and topsoil and seeding will follow sidewalk placement in these areas.
