

Your Next Hosted PBX Provider

1Wire Hosted PBX is a sophisticated telephone system, with minimal equipment costs.

A Hosted PBX from 1Wire lets employees work from remote offices, a hotel, or on their cell phone while remaining connected to the same office telephone system. Just like a Fortune 500 telephone system, you can transfer callers, put them on hold with music, set up conference calls or have the phone answered by an automated attendant who can direct callers to different departments.

Always connected

We offer companies with multiple locations the ability to operate under one umbrella. As a result, our clients enjoy increased productivity and reduced resource requirements.

Advanced phone features

Our service comes with advanced features such as, local and long-distance calling and powerful customizable features like auto-attendants, call queues, conference calling and much more.

Lower costs

You do not need to make a large upfront investment by purchasing an office telephone system and there is no need to maintain it. With a Hosted PBX solution the office telephone system is operated and maintained remotely by 1Wire.
