7/ Keying on CFVA 32E

Keying of a **CFVA 32E** in relation to its socket is carried out by orange key pegs **COCF 32**.
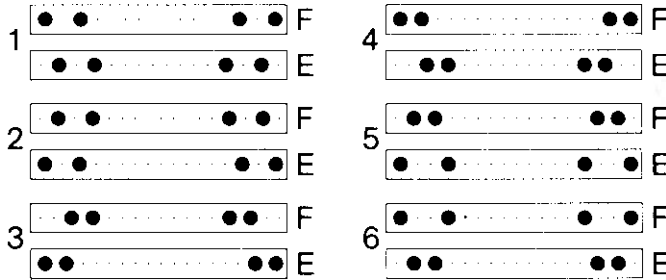

| COCF32 | 0173 660.16 |

How to use

On the **CFVA 32E**, the key pegs snap into the holes of the line situated between the two rows of contacts.
On the socket, they are wedged on the central row of contacts.

Example of keying with 8 key pegs

F = Connector unit (CFVA 32)
E = Male socket DIN 41612
● = Positions of key pegs

8/ Keying on CFVA 48E

Keying of a **CFVA 48E** in relation to its socket is carried out by metallic key pegs **COCF 48E**.

| COCF48 | 0174 129.27 |

How to use

The key pegs are pressed in using a **OUMPC** tool, in the two rows of holes separating the three rows of contacts.
Then, drill holes 1,6 mm .063" DIA. in the pyramidal housings of the male socket, to mate the **CFVA** key pegs.

| OUMPC | 0174 130.24 |

Example of keying with 2 key pegs.

F = Connector unit (CFVA 32)
E = Male socket DIN 41612
● = Positions of key pegs
o = Holes 1,6 mm .063" DIA. opposite key pegs
